

NDIRF COMPANION FORMS AND CHECKLISTS

These forms, checklists, and templates are provided as optional risk-management tools to assist members in documenting sanitary sewer inspection, maintenance, response, and related activities. They are intended as examples only and may be modified, supplemented, replaced, or adapted by each member to reflect local operations, staffing, equipment, recordkeeping systems, ordinances, and practices.

Use of these forms is not required by the NDIRF and does not establish a standard of care, create legal obligations, guarantee regulatory compliance, or affect coverage under any NDIRF Memorandum of Coverage. Members should consult with their legal counsel, engineer, utility personnel, and other advisors regarding the development of policies, procedures, and documentation practices appropriate for their operations.
